Dear Partner and to whom it may concern,

The Saltpipe is a II/a class medical device, which product we have been distributing since more than 15 years. During this time we have sold hundreds of thousands Saltpipes for patients suffered from asthmatic, allergic and other respiratory diseases. We can declare that we have never received a feedback which would allude for any problem or sickness due to the use of Saltpipe.

The inhalation of salty air can not cause problem, but has positive effects to the respiratory system.

Budapest, 12 September 2017.

Dr. György Bakanek
medical expert
